

TRAFFIC MANAGEMENT DURING CONSTRUCTION

Trans Mountain is committed to ensuring that construction-related traffic impacts such as road and lane closures or use of public roads by construction vehicles pose as little disturbance as is practical to neighbouring residents, landowners, businesses and communities.

Trans Mountain will develop plans to manage traffic and access control during construction.

Plans will include the following:

- Details about the timing, location and nature of any lane and road closures and other impacts, as well as the controls to be implemented to ensure traffic safety
- Communication strategies and tactics to ensure affected road users are aware of traffic impacts and can provide feedback during construction
- How access for emergency vehicles to and through the work sites will be provided

The Traffic and Access Control Management Plan will be developed in consultation with affected municipal, regional and provincial government agencies.
