TRANS MOUNTAIN

Public Notice

Black Pines Transmission Line

February 2021*

As part of the Trans Mountain Expansion Project, Trans Mountain is building a new transmission line that will provide power to the Black Pines Pump Station. Pump stations help move our product through the pipelines. Construction of the Black Pines transmission line is expected to begin in mid- to late- March 2021.

As the transmission line will traverse the North Thompson River, Trans Mountain hereby gives notice that a submission has been added to the Navigable Waters Registry pursuant to the *Canadian Navigable Waters Act* for public comment described here in and its site and plans.

Pursuant to paragraph 10(1)(b) of the Act, Trans Mountain has deposited with the Minister of Transport, on the on-line Common Project Search Registry (<http://cps.canada.ca/>) and under registry number **2879**, a description of the work, its site and plans. Work will include access road development, transportation of equipment, and installation of pole structures including crane pads and concrete piers on either side of the North Thompson River. There will be no access road developed on the mid-channel island, as no pole will be located on the island. This work will occur on the east side of Hwy 5 to a new substation located at the Trans Mountain Black Pines Pump Station, west of the North Thompson River.

Comments regarding the potential impact of this work on waterway navigation can be sent through the Common Project Search site mentioned above under the Comment section (search by the above referenced number). If you do not have access to the internet, comments can be provided directly to Trans Mountain at 1.866.514.6700 or by mail at P.O. Box 81018 Burnaby BC, V5H 3B0.

Note that comments will be considered only if they are received not later than 30 days after the publication of this notice.

*Dates are subject to change. Commencement of work is subject to necessary regulatory approvals and permits.

PROJECT UPDATES

More detail about transmission line construction is available at www.transmountain.com/news/2020/what-you-need-to-know-transmission-line-construction

Trans Mountain's first priority is the health and safety of our workforce, their families and our communities. In response to the evolving COVID-19 pandemic, Trans Mountain and our construction contractors for the Trans Mountain Expansion Project have been working diligently together to ensure adherence to all advice and direction from government and health officials both provincially and federally.
