

Landowner Update

Washington State | Spring 2023

**Test your safe
digging knowledge
for a chance to win!**

If you plan any digging or other ground disturbance activity, no matter how small the project may seem, using the free 811 service is an important step to ensuring you maintain a safe environment for your family, neighbours and community.

Make the Right Call

Does the warmer weather have you thinking about your next outdoor project? Let's make sure you make the right call! Before fixing the fence or planting that tree, contact 811.

If your construction or home improvement project is within 100 feet of the Trans Mountain pipeline, we will be notified through the 811 service and will be able to assist you with the pipeline safety requirements, so your project is conducted safely and in compliance with the Trans Mountain right-of-way agreement.

It is a condition of our right-of-way agreement to obtain Trans Mountain's written consent for proposed improvements near the pipeline. This consent is provided to you in the form of a permit, which can be obtained by contacting 811, at no cost to you. After you contact 811, a Trans Mountain Inspector will help you identify activities that would be permitted on the right-of-way and those that would be considered encroachments.

What is an encroachment?

An unauthorized encroachment is an unpermitted intrusion of

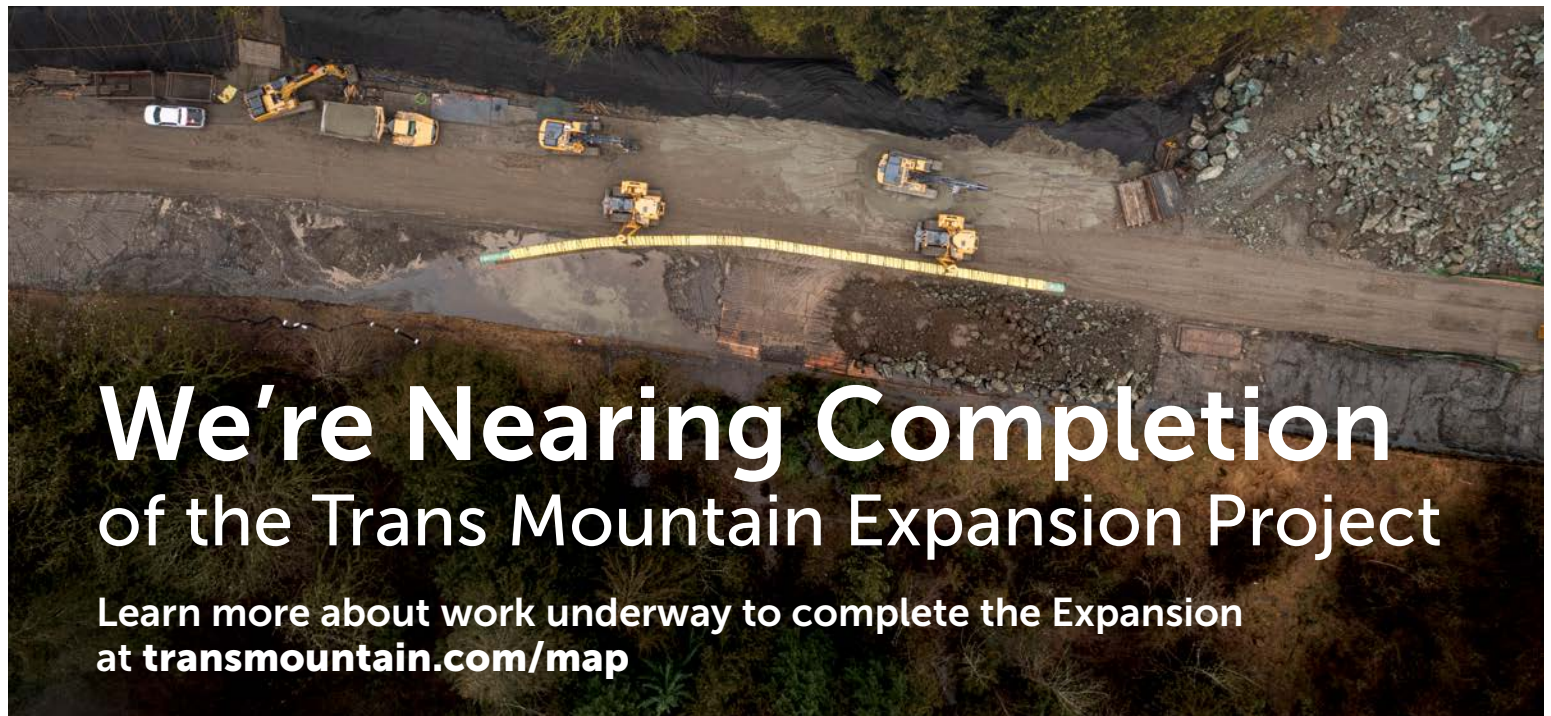

a structure, part of a structure or land use into the right-of-way area. Some common examples of potential encroachments that are not permitted on the right-of-way are sheds, concrete patios, pools, hot tubs, decks, ponds, overhangs and other structures.

What if you start your project without placing a One Call?

You'll receive a visit from one of our Pipeline Protection Inspectors – they'll ask you to stop work while they locate the pipeline and take some measurements. Your plans to fix the fence or plant the tree may have to wait until you receive a written permit from Trans Mountain.

Contacting 811 two working days before digging near a federally regulated pipeline is the law, but more importantly, it prevents accidental pipe damage and keeps you and everyone around you safe.

**Make the right call.
Click or call before you dig.**

We're Nearing Completion of the Trans Mountain Expansion Project

Bridal Falls

Not Worth the Risk

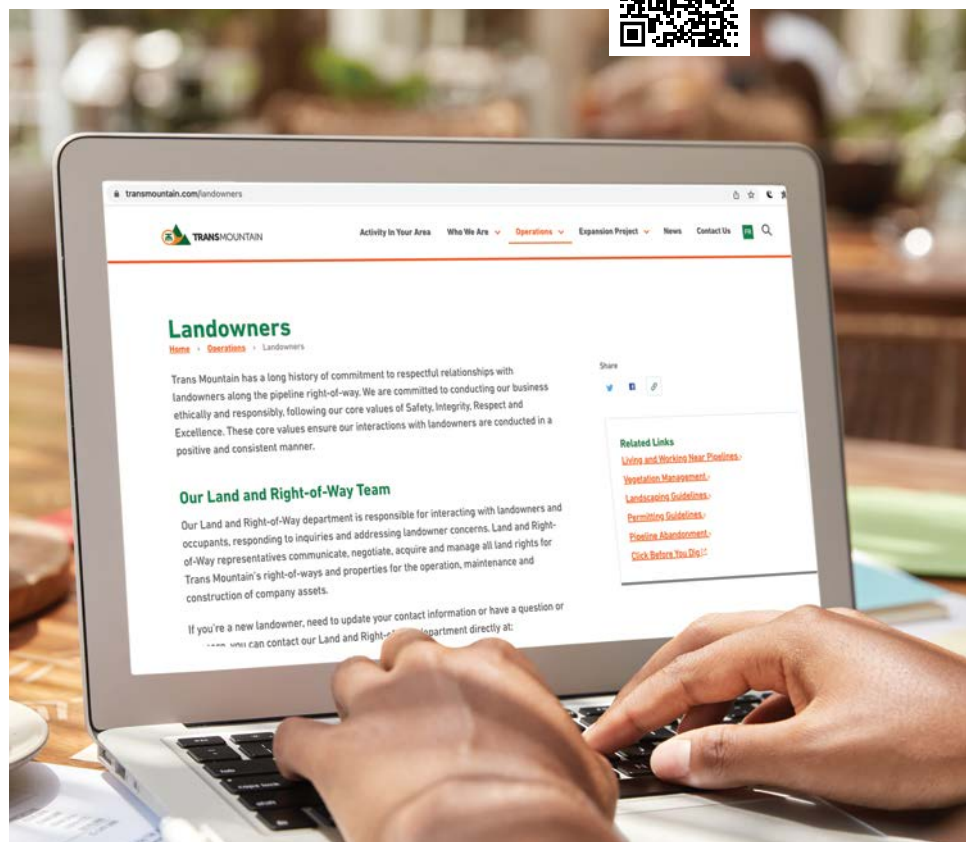

Carrying out activities on the Trans Mountain pipeline right-of-way that are not allowed can put people and property at risk. We inspect right-of-ways regularly. Unauthorized activities may result in legal action or fines.

One Stop for Everything

Trans Mountain has a dedicated webpage with helpful links and information of interest to landowners.

Chip Lake Emergency Exercise

Plan, Prepare, Practice: Emergency Exercises

Last year, we completed more than 20 emergency exercises, allowing responders – including first responders from the communities where we operate – to practice deployment procedures under a variety of environmental conditions all along our pipeline right-of-way.

A full-scale exercise in Edmonton, Alberta, included more than 150 employees, external participants, and observers. Wildfire training sessions held in advance of wildfire season offered participants an opportunity to review and practice defensive firefighting strategies designed to protect our facilities from approaching wildfires. Throughout the year, in all conditions and locations, we practiced our response plans for the rare event of an oil spill.

We are legally required to have an Emergency Management Program that anticipates, prevents, manages, and mitigates emergencies. That's why all our employees and contractors receive the training necessary to protect themselves, the public, and the environment in the rare event of an emergency.

In case of a pipeline emergency or to
report odours, call 24 hours: **1.888.876.6711**

Test Your Safe Digging Knowledge

Complete a short *dig safe* quiz to test your safe digging knowledge and be entered for a chance to win. One lucky winner will be selected in a random draw on May 23, 2023 to receive a tablet!

If you are unable to participate online, you can request a hard copy survey by calling **1.866.514.6700**.

April is Dig Safe Month

April is recognized as Dig Safe month, an initiative dedicated to promoting safe digging practices and the importance of contacting 811 before beginning any ground disturbance activity. 811 is a free service that connects you with member utility owners so you can get information about underground utilities buried in your yard or job site.
