

Construction activity related to the Trans Mountain Expansion Project is underway in your region.

Health and safety for our workers, their families and communities is a top priority while maintaining safe construction activities during COVID-19. Trans Mountain and its Project contractors are adopting government and company health and safety measures to protect its workforce and ensure work can safely continue.

Trans Mountain is monitoring the impact of construction on pipeline communities through a series of indicators identified in the Socio-Economic Effects Monitoring Plan. This Project impact information is gathered for each three-month period in a regional Socio-Economic Monitoring Report. Highlights from the quarterly regional report are provided here.

Go to transmountain.com/socio-economic-reports to view the complete Socio-Economic Monitoring Report for this region.

Noise from Truck Traffic on McKee Road

McKee Road is the primary access route to the Sumas Terminal as approved by the Canada Energy Regulator. Contractors have a Traffic Management Plan that addresses access roads/routes to the construction site and Traffic Control Plans for each work zone which consider potential impacts with mitigation. A policy of no engine retarders when travelling to and from the highway is enforced to ensure reasonable noise levels.
