

Construction activity related to the Trans Mountain Expansion Project is underway in your region.

Health and safety for our workers, their families and communities is a top priority while maintaining safe construction activities during COVID-19. Trans Mountain and its Project contractors are adopting government and company health and safety measures to protect its workforce and ensure work can safely continue.

Trans Mountain is monitoring the impact of construction on pipeline communities through a series of indicators identified in the Socio-Economic Effects Monitoring Plan. This Project impact information is gathered for each three-month period in a regional Socio-Economic Monitoring Report. Highlights from the quarterly regional report are provided here.

Go to [transmountain.com/socio-economic-reports](https://transmountain.com/socio-economic-reports) to view the complete Socio-Economic Monitoring Report for this region.

Way of Life

### Noise, Dust, Vibration, Traffic Lighting

Trans Mountain will continue to follow up on dust, noise, and vibration complaints to confirm their relation to Project activity. Trans Mountain is working to ensure compliance with noise-related bylaws and requirements. Trans Mountain will work with stakeholders to resolve and address such complaints where practical.

### Windshield damage, rock from Project vehicle

Trans Mountain follows up on any traffic-related concerns. Contractors have a Traffic Management Plan and Traffic Control Plans to address each work zone. In this incident, though specific connection to a Project vehicle could not be determined, a blanket reminder to ensure trucks are free of debris was issued to all drivers leaving the Project site.

### Adverse interaction of cyclist with groove in matting

Trans Mountain will follow up on reported community safety concerns. In this instance, Trans Mountain noted an assessment would be completed on other ramps in the area for adjustments and followed up with the individual regarding damages.
