Annex 1: Socio-Economic Context Indicators - Greater Edmonton Region

As of December 31, 2022

Based on government and public sources

Introduction

This report presents the context indicators associated with the TMEP Greater Edmonton Region, updated to reflect the October to December (Q4) 2022 monitoring period. These data are from public and government sources. They reflect the overall socio-economic context within which Project construction is occurring and present a picture of the overall social and economic vulnerability or resiliency of the region related to the socio-economic monitoring topic areas. Data is being reported for the entire region, even though construction activity may only be occurring in a select portion of the region. These data will be updated during Project construction when new data becomes available. This report also provides a one-time update of select community-level data points for communities crossed by the Project footprint have been updated since the finalization of the Socio-Economic Effects Monitoring Plan based on the 2016 Census of Canada; this data is only updated every 5 years, so will not be updated during the Project construction period.

Methodology and Notes

Notes

n/a = data not available; suppressed to meet the confidentiality requirements of the Statistics Act

All numbers are approximate. In certain instances (e.g., gender-based crimes), additional decimal spaces are shown in order to capture small numbers.

COVID-19 numbers reflects change in government reporting; no longer reporting active cases.
